## Summary

Economics Ph.D. specializing in Causal Inference, Machine Learning, Econometrics, and Bayesian Statistics

4 years of work experience using analytics to solve product and business problems, coding (Python, R, SQL), and statistical analysis

## TECHNICAL SKILLS

Causal Inference & Experimentation: A/B Testing, Instrumental Variable (IV), Diff-in-Diff, Double ML, Synthetic Control, Policy Impact Evaluation

Data Modeling & Machine Learning: Bayesian Statistics, Time-Series Analysis, Random Forests, Support Vector Machines, Lasso/ElasticNet Regression, Clustering (K-Means, GMM)

Certifications: Financial Risk Manager (FRM) – Both Levels, Chartered Financial Analyst (CFA) – Level I

Programming & Data Tools: Python, SQL, R, MATLAB, STATA, Stan, SurveyCTO, ODK, GIS, Git, Power BI, Tableau, LATEX

# Data Science Projects

MilkChain | Python, R, Stata, Machine Learning, Bayesian Models, A/B Testing

Aug. 2021 – Dec. 2024

- Led a cross-functional team of software engineers, data analysts, and field coordinators to develop a digital traceability system monitoring milk movement across 1,200+ farmers, intermediaries, and retailers in Kenya's dairy supply chain
- Designed and implemented machine learning models (Lasso, ElasticNet) in Python to predict milk quality, applying data preprocessing, feature selection, and hyperparameter tuning to optimize model performance
- Developed Bayesian hierarchical models using Markov Chain Monte Carlo (MCMC) algorithms in R, achieving 90%+
  prediction accuracy on milk quality classification
- Designed and led a \$148K (independently raised from NSF, MIT/J-PAL, Weiss Fund, etc.) A/B testing project that revealed hidden milk quality information via traceability systems and Bayesian models, reducing milk adulteration by 21.9%

RainDistancing | Python, Stata, GIS, Instrumental Variable (IV)

Apr. 2020 – Jan. 2022

- Processed and integrated large-scale geospatial datasets using QGIS and Python, analyzing mobility patterns across 1,900+ U.S. counties to assess weather-driven behavioral shifts
- Built causal inference models (Instrumental Variable) to quantify the economic and epidemiological effects of mobility changes
- Published findings in the Journal of Health Economics (2022), advancing evidence-based pandemic policy design

## EXPERIENCE

## Visiting Scientist

Aug. 2021 – Sep. 2024

CGIAR International Livestock Research Institute (ILRI)

Nairobi, Kenya

- $\bullet \ \ \text{Led 2 large-scale causal inference studies impacting 6,000+ smallholder farmers across 120+ Kenyan \ dairy \ cooperatives$
- Developed a digital credit scoring model using logistic regression, leveraging transaction histories and farm productivity data to predict loan repayment likelihood and improve financial access for smallholder farmers

• Led a \$803K A/B testing project with 180 maize cooperatives, connecting farmers to processors through the UN WFP Farm

• Managed A/B testing with 1,080 participants to evaluate adoption, impact, and spillover of digital decision-support tools

#### Research Associate

Jan. 2021 - Aug. 2021

Innovations for Poverty Action (IPA)

Kiqali, Rwanda

- to Market Alliance program, resulting in 150%-300% revenue increases • Designed and implemented survey instruments using SurveyCTO for 3 large-scale randomized evaluations, collecting data
- from 2,500+ farmers and cooperative leaders across Rwanda
- Managed field teams of 50+ enumerators to ensure high-quality data collection and compliance with research protocols

## Equity Data Analyst

Jul. 2017 – Apr. 2018

Morningstar

Shenzhen, China

- Analyzed annual and quarterly financial reports for 300+ publicly listed companies in North America
- Conducted financial performance assessments utilizing DCF, comparable company analysis (CCA), and regression models, resulting in 20+ data-driven investment recommendations
- Utilized SQL window functions, user-defined functions (UDFs), and self-joins to efficiently extract, clean, and analyze financial datasets from relational databases, ensuring data integrity and consistency in reporting

#### EDUCATION

## University of California, Santa Cruz

Santa Cruz, CA

 $Ph.D.\ in\ Economics,\ Department\ of\ Economics\ (GPA:\ 3.95/4.0)$ 

Sep. 2018 - Jun. 2025

- UCSC Chancellor's Dissertation-Year Fellowship Only recipient from Economics Department in decades
- Annual Award for Excellence in Teaching

## Jiangxi University of Finance and Economics

Jiangxi, China

B.S. in Finance, International School (GPA: 93/100, Rank: 2/557)

Sep. 2013 - Jun. 2017

- China National Scholarship by Ministry of Education (Awarded to top 3 among 2,300)
- CFA Program Student Scholarship by CFA Institute
